CAREER OBJECTIVE

To secure a challenging position where I can utilize my skills in software testing, quality assurance, and development while continuously improving my knowledge in AI and technologies. I aim to contribute to building high-quality, scalable, and reliable software products through strong analytical thinking, problem-solving ability, and a commitment to continuous learning.

EXPERIENCES

Domains: ERP | SaaS | E-commerce

Total Experiences 1.7+ years

BD Funnel Builder Limited

Apr 2026 – Present

Junior SQA Engineer

Dhaka, Bangladesh

Responsibilities & Achievement

- Designed and executed test cases and QA checklists for a web-based E-commerce platform.
- Functional, Regression, and API & Sanity testing & managed the full bug lifecycle using issue tracking tools.
- Validated end-to-end user flows including Signup, Login, Shop Creation, Order Placement and Delivery.
- Order management, courier integration, and payment workflows to verify accurate status synchronization.
- Performed QA validation of platform addons (SMS, Fake Order, Call Automation, WooCommerce), including site creation, custom domain connection, and DNS configuration to ensure stable deployments.
- Identified, documented, and tracked defects proactively (pre-deployment) and reactively (support-reported).
- Conducted landing page QA and validated Google Tag Manager (GTM) and Facebook Pixel events (Page View, Add to Cart, Checkout & Purchase) to ensure accurate tracking and analytics reporting.

RAVENSION.COM
